

Eating Disorder Partial Hospitalization Programs

To assist with evaluating whether someone is medically stable to participate in the HopeWay Center for Eating Disorders Partial Hospitalization Program, the following lab work is required. The results will be reviewed by a healthcare provider before the client is considered for admission.

Lab work needed:

- Amylase
- Lipase
- Lipid panel
- Iron panel (iron, iron set, IBC, ferritin)
- B12
- Vitamin D
- Thyroid panel (TSH, T4, T3, free and total)
- Prealbumin
- Estradiol; Testosterone, total; Testosterone, free (as appropriate)
- CBC (Complete Blood Count)
- CMP (Complete Metabolic Panel)
- Magnesium
- Phosphorous

Please send the results to your Admission Specialist via email or fax 980-203-4619.

Thank you,

HopeWay
