

Eating Disorder Partial Hospitalization Programs

To assist with evaluating whether someone is medically stable to participate in HopeWay's partial hospitalization programs, the following lab work is required. A HopeWay healthcare provider will review the results before the client is considered for admission.

Lab work needed:

- Amylase
- Lipase
- Lipid panel
- Iron panel (iron, iron set, IBC, ferritin)
- B12
- Vitamin D
- Estradiol
- Thyroid panel (TSH, T4, T3, free and total)
- Prealbumin
- Estradiol; Testosterone, total; Testosterone, free (as appropriate)
- CBC (Complete Blood Count)
- CMP (Complete Metabolic Panel)
- Magnesium
- Phosphorous

Please send the results to your Admission Specialist via email or fax 980-203-4619.

Thank you,

HopeWay
